## **FISCAL ANALYSIS**

### **ASSUMPTION**

Officials from the **Department of Social Services - MO HealthNet Division (MHD)** assume this proposal is not directing the MHD to put together a new diabetes management program but rather to work together with the Department of Health and Senior Services, develop action plans, write reports with outcomes, costs, and impact estimates, and estimate what it would cost to develop new programs and budget requests. There will be no fiscal impact to MHD.

Officials from the **Department of Health and Senior Services** assume the proposal would not fiscally impact their agency.

#### **House Amendment No. 1**

#### **§191.1140 - Show-Me Extension for Community Health Care Outcomes (ECHO) Program**

In response to the similar legislation from the current session (HB 2154), officials from the **University of Missouri (UM or University)** stated there is a line item in HB 3 budgeting \$1.5 million so the University can implement and manage the Show-Me Extension for Community Health Care Outcomes (ECHO) Program. This is the annual cost of the program that has been developed and designed by the University. There will be additional costs if the program is expanded.

**Oversight** notes funding is subject to appropriations and is presenting the cost as \$0 or (\$1,500,000) to the General Revenue Fund.

Officials from the **Department of Mental Health**, the **Department of Health and Senior Services**, and the **Department of Social Services** each assume the proposal would not fiscally impact their respective agencies.

FISCAL IMPACT - Small Business

This proposal may have an impact on small business health care providers who participate in the program.

## FISCAL DESCRIPTION

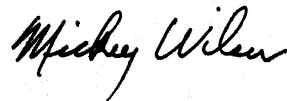

### House Amendment No. 1

Subject to appropriations, the University of Missouri shall manage the “Show-Me Extension for Community Health Care Outcomes (ECHO) Program”. The program is designed to utilize current telehealth technology to disseminate knowledge of best practices for the treatment of chronic, common, and complex diseases from a multidisciplinary team of medical experts to local primary care providers who will deliver the treatment protocol to patients. This will alleviate the need of many patients to travel to see specialists and will allow patients to receive treatment more quickly. The program will utilize local community health care workers as a way to obtain better patient compliance and improved health care outcomes.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
